

Technicians Service Training

Presents

“Diagnostic Soup”

Topic

“Diagnostic Soup”

It encompasses a variety of case studies that will cover the full spectrum of diagnostic procedures dealing with many subsystems on vehicles such as ABS, Air Bag, Hybrids, Reprogramming, Drivability and Electrical problems. Each case study will incorporate system strategies and procedures to help the technician fully understand the paths taken to resolve each diagnostic encounter. This is no class on war stories, but rather a class on strengthening and enhancing the procedures a technician should know while out in the field diagnosing problem vehicles.

John Anello

John is TST’s first associate and presently runs a Mobile Diagnostic Center from which he provides technical assistance for about 800 dealers, body shops and repair shops. His daily routine involves the diagnostics of many operating systems such as ABS, Air Bag, ECM, BCM and engine/electrical analysis. He has diagnosed close to 20,000 vehicles of all makes and models. John also beta tests equipment for five major tool manufacturers so their tools can be fine tuned to meet technicians requirements for real world applications. He has particularly valuable insight in our industry, because of all the problem vehicle she has been exposed to.

DATE: Wednesday September 10th, 2008 at 6:45 pm

**PLACE: American Legion Post
180 Union Blvd, Totowa, NJ 07512**

COST: \$65.00 for member \$90.00 non members

**Make checks out and send to TST:
11 Lupi Plaza, Mahopac, NY 10541**

845 628-6928

Please register early to avoid delays or pay at the door!

HANDS ON CERTIFICATION (Now Available Electrical 1, 2, and Computer 1)
