Fast, competent and feature-packed with many OE-level bi-directional functions including initializations, adaptations, coding and programming.

iSCAN Diagnostic Software Covers
The Most Vehicle Makes

European, Asian, Domestic, Supercar, and some Medium-Duty Truck.

Integrated Programming is Fast, Reliable & Easy to Use

- **BMW / MINI**
- **Mercedes-Benz**
- **Land Rover**
- **Ford & Mazda**

SOD fills in the gaps using OE licensed subscriptions

- Vehicle coverage includes many of the latest **2019** & **2020** vehicles.

- **Perform service functions** (SRI, Parking Brake, etc.) on the latest European vehicles such as Mercedes Benz, Porsche, Land Rover, Volvo and many others!

- **Fully DoIP** (Ethernet vehicle communication protocol) enabled – communicate with late- model vehicles that the other diagnostic providers can't.

iSCAN

SUPPORT ON DEMAND
SOD

A first of its kind, patent-pending technology that allows for remote diagnostics and flash programming capabilities from multiple, third- party providers.

iSCAN SOD is unique in that it marries OE and J2534 protocols for faster and more complete functionality across most major vehicle makes. Only the iSCAN device with a stable Internet connection and a suitable programming smart battery charger are needed at the vehicle.

SUPPORT ON DEMAND

- Always available when needed
- No subscriptions required
- Open provider network – you pick the service (diagnostics / programming) provider of YOUR choice
- Pay only for the services you use

SUPPORT ON DEMAND
