

Welcome

Presents:

**"Troubleshooting Faults
On Today's Vehicles"**

Instructor: *Brandon Steckler*

What Will Be Covered:

- *Troubleshooting faults on today's vehicles require an evolution of approach.*
- *Considering faults like network-induced parasitic drains, ECU power-molding, and driveability concerns on GDI platforms, it's wonder that technicians struggle. They are still attacking these vehicles with the same approach they always have!*
- *Stick with Brandon (from S.W.A.T. Training and Diagnostics) and see his approach to real-world problems from around the globe, and the solutions he generates!*
