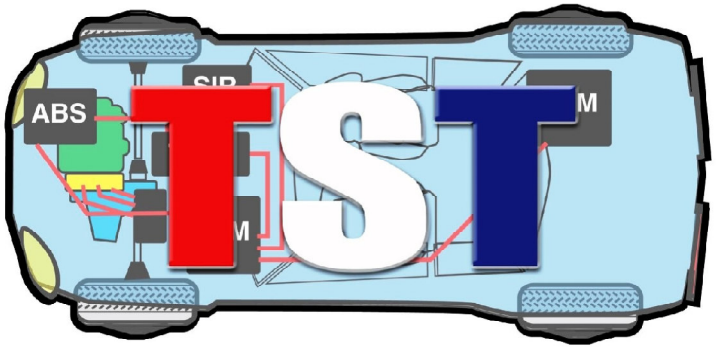
Welcome



Presents

"ADAS"

Instructor: Scott Brown

What Will Be Covered:

- **This webinar covers not only the basics of advanced driver assistance systems (ADAS), but we will also dive into computer vision and perception systems and learn about the science driving these technologies.**

- **Systems, which include features like lane departure warning, automatic emergency braking, and adaptive cruise control, are designed to improve vehicle safety and reduce driver workload.**

- **By the end of the webinar, service professionals will have a solid understanding of ADAS, how to properly communicate with motorists about how the systems operate and function and describe the importance of maintaining proper system operation.**
